

Section 2 Maryland EPSDT Preventive Health Schedule Care

C. ADDITIONAL SCREENING SERVICES

Preventive care follow-up visits may be provided at intervals other than those required by the *Maryland Healthy Kids Preventive Health Schedule*. These follow-up visits to a full preventive visit allow reassessment of a previously diagnosed condition. The scope of service at this type of screen is limited to that which is medically necessary to provide confirmation of a diagnosis and/or follow-up the treatment or referral of the child for specialty care.
